

Platinum Card[®] 4 in 1

The perfect Combination

**Data/Fax Modem
GSM/GPRS Ready
ISDN Ready
LAN Ready**

**The 4 in 1 Platinum Card
is the world first 4 in 1 card
offering 56K and advantages
of GSM, ISDN,
ETHERNET options.**

Internet up to 56K

The 4 in 1 Platinum Card supports all the communication functions including access to the Internet at 56,000 bps. Complying with the industrial standard adopted by the the biggest Internet access providers, the 4 in 1 Platinum Card is ideal for surfing on the Web.

The 4 in 1 Platinum Card is already compatible with the future ITU-T V.90 standard. Once this standard is in effect, just connect yourself to the COM One site (www.com1-telecom.com) for a free update of the PC Card.

GSM/GPRS ready

Thanks to the COM One GSM/GPRS kits, surf the net, get your e-mails, ... wherever you are in the world (GSM, DCS and PCS networks are supported).

The 4 in 1 Platinum Card is ready for the future GSM network upgrades. The COM One GSM/GPRS kits are approved by the market leading handset manufacturers: **Nokia, Ericsson, Motorola, Siemens, Sony...**

ISDN ready

Thanks to the COM One ISDN kit, the 4 in 1 Platinum Card provides connection to the ISDN network: connect to the Internet at 128 Kbps, get a remote access to your corporate profile,... The COM One ISDN kit is compatible with a large range of ISDN applications.

Ethernet ready

The 4 in 1 Platinum Card can be connected to any 10 Base T Ethernet network, via the COM One LAN kit.

Multi country approvals

Complying with the European CTR21 standard, the 4 in 1 Platinum Card has an integrated line interface: it can be used anywhere in the world without requiring any user adjustments. It supports two connectors on the same panel, enabling both the PSTN/LAN connection kit to be connected simultaneously.
